

IMPORTANT INFORMATION

- I. Income Partners Managed Volatility High Yield Bond Fund (the "Fund") invests primarily in high yield debt instruments, which are below investment grade or unrated. The Fund will invest in high yield debt instruments, and as a result may be subject to substantial credit/counterparty risk, credit rating related risks, interest rates risk, liquidity risks, and valuation risks. The investments held by the Fund may fall in value and therefore your investment in the Fund may suffer losses.
- II. The Fund's managed volatility strategy may not achieve the desired results under all circumstances. While the Fund's manager will endeavor to manage the Fund such that it does not exceed its pre-determined annualized volatility target, there is no guarantee that such targets can be reached in all market conditions. Managed volatility does not necessarily mean lower risk and the Fund may still suffer losses.
- III. The Fund is denominated in RMB, and RMB is currently not freely convertible and is subject to exchange controls and restrictions. There is no guarantee that RMB will not depreciate. If you convert Hong Kong Dollar or any other currency into RMB so as to invest in the Fund and subsequently convert the RMB redemption proceeds back into Hong Kong Dollar or any other currency, you may suffer a loss if RMB depreciates against Hong Kong Dollar or other currency. In addition, the underlying investments in the Fund may be denominated in currencies other than RMB. The NAV may be affected favorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in the exchange rate controls.
- IV. The Fund invests in the Greater China region and in the China market and there is subject to emerging market risk including political, economic, legal, regulatory and liquidity risks.
- V. The Fund may invest in derivative transactions such as swaps, futures and forwards for hedging purposes. There is no guarantee that the hedging techniques will be effective.
- VI. In respect of the distribution Units of the Fund (save for Class 2C Dis (USD) Units), the Fund's manager currently intends to make monthly dividend distribution. However, the distribution amount of dividend rate is not guaranteed. In respect of the Class 2C Dis (USD) Units, the Fund's manager makes non-discretionary monthly distributions. For certain classes of Units of the Fund, the Fund's manager may at its discretion pay distributions out of the capital of the Fund. The Fund's manager may also, at its discretion, pay distributions out of gross income, while paying all or part of the fees and expenses of the capital of the Fund, resulting in an increase in distributable income for payment of distributions by the Fund. Therefore the Fund may effectively make payment of dividend out of capital. Payment of distributions out of capital represents a return or withdrawal of part of the amount they originally invested of from any capital gains attributable to the original investment. Any such distributions may result in an immediate reduction of the net asset value per unit of the Fund.
- VII. Investment involves risk. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.
- VIII. In making investment decisions, investors should not rely solely on the information in this report and should read the offering document of the Fund of further details including the risk factors. This document does not constitute an offering document.

INVESTMENT OBJECTIVE

The Fund seeks to maximize total investment returns, comprising capital appreciation and interest income by primarily investing in high yield debt instruments that are below investment grade or unrated. It aims to deliver high yield returns with a reduced level of volatility compared against the broader high yield market through an active managed volatility strategy by using both quantitative and qualitative measures. The Fund has a geographical focus on Greater China and Asia.

Unless stated otherwise, all data as of 29 May 2026. Source: Income Partners, fund performance is calculated on NAV to NAV basis in denominated currency with dividends re-invested. Performance is presented on a net-of-fees basis. Past performance is not indicative of future results.

1. Source: Lianhe Ratings Global Limited, an international credit rating company, has assigned 'BBBf' Fund Credit Quality Rating ("FCQR") to Income Partners Managed Volatility High Yield Bond Fund at on November 2025
2. This document contains fund performance or NAV numbers which may be subject to amendments and further verification by the fund administrator. The fund administrator, rather than the manager, publishes the official fund NAV. Any performance numbers contained herein should not be relied on as official or final NAV of the Fund.
3. The total return chart above shows the Fund's total return performance since inception.
4. Annualized Dividend Yield: [(1 + distribution per unit / ex-dividend NAV) ^ distribution frequency] - 1. Yield figures are estimates and are based on the latest dividend distribution and the ex-dividend NAV of the previous month. Yield figures are for reference only. Positive dividend yield does not imply positive return. Dividend rate is not guaranteed and distributions may be paid from capital. In respect of the Class 2C (USD) Distribution Units, pay out non-discretionary monthly distributions at a fixed percentage of 7% per annum. The 7% annualized yield is calculated as follows: (total dividend paid or to be paid over the current calendar year / last available net asset value of the Fund in the prior calendar year) x 100%.
5. The calendar performance figures are calculated from share class launch dates to calendar year-end.
6. Based on monthly returns. The Sharpe Ratio is calculated as annualized return minus risk free rate (RFR) divided by annualized standard deviation. RFR is the simple average of 1 year CNH cross-currency swap rate.
7. Yield to Maturity in RMB applies to all Unhedged share classes in RMB (2B), USD (2A), HKD (2D), AUD (2E), SGD (2H), EUR (2J), as investors are exposed to RMB risk.
8. Yield to Maturity in USD applies to all Hedged share classes in USD-Hedged (2G), AUD-Hedged (2F), HKD-Hedged (2L), SGD-Hedged (2I), EUR-Hedged (2K), RMB (USD Exposure) (2X) as investors are not exposed to RMB risk.
9. Where applicable, workout dates are used for the calculation of yield to maturity for callable bonds (sourced from Bloomberg). When calculating average YTM of the Fund, we conservatively use zero yield for defaulted bonds. For bonds with YTM that is greater than 80%, we conservatively apply current yield in place of YTM.
- * The fund is approved by The Hong Kong Securities and Futures Commission (SFC) for public offering in Hong Kong.
- * The fund is recognized under the Mainland-Hong Kong Mutual Recognition of Funds (MRF) scheme for distribution in mainland China.
- * With effect from 1 March 2024, the Fund is an eligible collective investment scheme in the new Capital Investment Entrant Scheme (New CIES) in Hong Kong.

Industry Exposure

Credit Rating Exposure (Issuer)¹⁰

Credit Rating Exposure (Bond)¹⁰

MANAGER'S COMMENTARY¹⁵

May 2026 delivered constructive performance for the Asian bond market, anchored by resilient credit fundamentals and strong demand for income-generating assets. Following recent market recalibrations, regional credit spreads remained structurally compressed. A pronounced yield divergence between the investment-grade (IG) and high-yield (HY) segments underscored an income-driven environment, where investors actively sought attractive carry to offset ongoing global interest rate volatility.

In China, economic momentum reflected a transitional phase. May's official manufacturing PMI stalled at the 50.0 threshold as weakening overseas demand constrained factory output. Concurrently, consumer prices rose 1.2% year-on-year but contracted 0.1% month-on-month, indicating that domestic deflation remains fragile and warrants sustained policy intervention to solidify broader macroeconomic trends. In the U.S., inflationary pressures resurged, primarily driven by energy price spikes linked to Middle Eastern geopolitical tensions. Headline CPI, which rose 3.8% year-on-year in April, accelerated further to 4.2% in May—the highest level since early 2023. Although military actions have de-escalated significantly following the early April ceasefire, subsequent negotiations have proven turbulent, with both the U.S. and Iran reluctant to compromise on key interests. Nevertheless, underlying efforts to narrow the gap are progressing. While further concessions will be necessary to secure a finalized agreement, we do not currently expect this conflict to escalate into a protracted, broader scenario.

MANAGER'S COMMENTARY (Cont'd)¹⁵

Broader Asian market performance remained heavily influenced by U.S. Treasury movements, delivering modest positive returns in May despite a notable divergence between the IG and HY segments. For investment-grade bonds, base rate yields largely dictated overall performance. Notably, since the April ceasefire, Asian IG credit spreads have narrowed by approximately 15 basis points on average, partially offsetting the headwind of rising interest rates. Conversely, high-yield credit spreads have tightened significantly—compressing by 70 basis points over the same period. This robust tightening drove the HY segment's outperformance over IG throughout April and May, notably exhibiting lower relative volatility. With credit spreads for both segments having reached year-to-date lows, the market is demonstrating strong fundamental support driven primarily by intra-regional investors. We maintain a constructive outlook on Asian credit, particularly within the high-yield sector, and anticipate that IG will catch up in the second half of the year should a permanent peace agreement materialize.

Throughout May, the Fund maintained an average issuer rating of BBB-, prioritizing disciplined credit selection amidst dynamic valuations. We expect yields to remain elevated and highly data-dependent until a definitive Federal Reserve pivot occurs or clearer geopolitical resolutions emerge. To navigate this high-carry yet volatile environment, the Fund will continue actively targeting primary market concessions while deploying tactical duration adjustments to capture idiosyncratic value across Asian credit. Anticipating ongoing headline-driven volatility, we have strategically implemented hedges to protect the portfolio and mitigate downside risks. These hedges will be actively managed and lifted as peace talks yield greater clarity.

10. The lower rating among equivalent ratings from S&P, Moody's, Fitch, or other internationally recognized rating agencies will be adopted. For bond holdings that are not rated by S&P, Moody's, Fitch, or other internationally recognized rating agencies, Income Partners will exercise discretion to apply internal credit ratings.

11. Top 10 Holdings is grouped by issuer, the Fund may hold multiple issues from the same issuer.

12. The total exposures may vary due to rounding. The credit rating exposures presented here are based on ratings from S&P/Moody's/Fitch or equivalent ratings from other internationally recognized rating agencies. If S&P/Moody's/Fitch ratings for bond holdings are not available, Income Partners applies its internal credit ratings.
