MANAGER'S REPORT
INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

MARKET OVERVIEW AND OUTLOOK

In 2024, the Asian high yield bond market staged its strongest rally since 2012, with nearly every segment registering robust gains. Favorable macroeconomic conditions and improved credit fundamentals underpinned the rally, setting the stage for a compelling market outlook for the coming year. Below, please find a comprehensive market overview and our outlook for 2024.

In 2024, as the second year after the pandemic, global economic growth was moderate, hovering around 3% for the year. The U.S. economy led the developed markets, demonstrating resilience despite a restrictive high-interest-rate environment. The U.S. job market has remained strong, with recent data exceeding market expectations by a wide margin, and inflation has steadily declined. These positive developments have led the U.S. Federal Reserve to signal a slower pace of rate cuts in 2025. On the other hand, the Eurozone has faced greater pressures, prompting a more active approach to rate cuts. Years of elevated energy prices and increasing competition from emerging markets have challenged the Eurozone's position in the global value chain. These issues have triggered societal discontent, which is reshaping the political landscape in the region.

Turning to Asia, the growth outlook appears much brighter, with economies in the region benefiting from the recovery post-pandemic and continuing along a sturdy upward trajectory. China, however, is likely the laggard in the region, facing headwinds in 2024 due to sluggish domestic investment and consumption. On the investment side, the lingering effects of the property sector crackdown continue to weigh on buyers' confidence and constrain local government spending due to reduced land sales and property-related tax revenue. On the consumption front, tighter regulations sectors homing sizable middle-class, including internet and finance, have forced consumers to adopt a more austere spending approach. In response to these challenges, the Chinese government signaled a major policy shift in September 2024, with the aim of stabilizing the property sector, alleviating the fiscal strain on local governments, and boosting domestic consumption. A series of measures were released in the fourth quarter, and while we have observed some improvement, particularly in the property market, we believe additional measures will be necessary before a full turnaround can be declared.

Given weak sentiment, Asian high-yield bonds, especially those issued by Chinese private-sector companies, have been priced with substantial discounts, with yields to maturity (YTM) in the high single-digit range and above. Looking ahead to 2025, we expect continued pressure on the valuations of Chinese bonds, which will continue to offer attractive yields to investors. However, we anticipate increased differentiation, with higher-quality issuers beginning to tap the market at sub-10% yields, while others will face challenges and may need to seek alternative sources of funding to manage maturing debt. In terms of portfolio strategy, we plan to reduce our exposure to the property sector, which contributed notably to performance in 2024, while continuing to focus on industrial sectors that offer attractive upside potential.

Outside China, there has been increasing enthusiasm for other developing Asian countries, with India leading the charge due to its strong growth prospects. India, with its large, youthful population, has emerged as one of the most dynamic economies, attracting capital from around the world. This positive sentiment is reflected in the steady rise of Indian bonds in the Asian high-yield market. In fact, India overtook Hong Kong in 2024 to become the second-largest region in the market, with a weighting of nearly 19%, compared to 22% for mainland China. The Indian high-yield bond market is diversified, but renewable energy stands out as the most sought-after sector, driven by favorable government policies and increasing electricity demand from the country's rapidly expanding economy. We expect the Indian high-yield market to continue its growth trend in 2025, with more issuances expected. Despite relatively higher valuations of Indian bonds, the fund has steadily increased its exposure to India, as valuations in other regions have also been climbing, narrowing the gap. The overall positive sentiment in India provides issuers with smoother access to capital markets, leading to a larger market share for Indian bonds.

MANAGER'S REPORT
INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

MARKET OVERVIEW AND OUTLOOK

In other parts of Asia, Hong Kong accounts for 16% of the Asian high-yield market, ranking third behind mainland China and India, with average YTM at high single digits. Hong Kong faces challenges, such as the outflow of individuals and businesses over the past few years and structural changes in retail sales patterns, which have put pressure on its property sector, especially commercial real estate. Nevertheless, we see selective opportunities in Hong Kong and plan to take advantage of market volatility. Macau, accounting for around 10% of the market, is dominated by the gaming sector. We are comfortable with the improving credit fundamentals of gaming operators, supported by strong cash flows, and will maintain our exposure for decent carry. Market share for other Asian regions remains relatively small, apart from Pakistan and Sri Lanka, which have experienced rapid recovery from the pandemic's effects. Sri Lanka successfully restructured its sovereign debt, and its plan has been well-received by investors. We are constructive on both issuers and have included their bonds in the fund for attractive carry opportunities.

Looking ahead to 2025, we are optimistic about the opportunities that lie ahead in Asian high-yield bond market:

- A strong U.S. dollar will continue to attract capital into U.S. dollar-denominated assets. With interest rates likely to remain high for an extended period, Asian high-yield bonds offer attractive carry opportunities, with the average YTM currently around 10%.
- Yield compression potential: The high YTM in the current market is at the higher end of historical ranges, presenting capital potential as yields compress.
- Challenging primary market: The primary market will remain challenging for many issuers, with limited supply providing support for existing valuations.
- Visible cash flows: An average coupon rate of around 6% offers investors visible cash flows, acting as a buffer to absorb price volatility.

TRUSTEE'S REPORT
TO THE UNITHOLDERS OF INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND
FUND
(Sub-Fund of Income Partners Strategy Fund)

We hereby confirm that, in our opinion, the Manager of the Income Partners Managed Volatility High Yield Bond Fund (the "Sub-Fund") as a Sub-Fund of Income Partners Strategy Fund has, in all material respects, managed the Sub-Fund in accordance with the provisions of the Trust Deed dated 17 November 2010, as amended for the year ended 31 December 2024.

.....
Citrust Limited,
the Trustee

30 APR 2025

INDEPENDENT AUDITOR'S REPORT

TO THE TRUSTEE OF INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND

Opinion

We have audited the financial statements of Income Partners Managed Volatility High Yield Bond fund (the "Fund") set out on pages 12 to 74 which comprise the statement of financial position as at 31 December 2024, and the statement of comprehensive income, statement of changes in net assets attributable to unitholders and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information and other explanatory information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at 31 December 2024, and its financial performance, its changes in net assets attributable to holders of redeemable participating shares, and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IASB").

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (the "IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Matter

The financial statements of the Fund for the year ended 31 December 2023, were audited by another auditor who expressed an unmodified opinion on those statements on 27 March 2024.

Other Information

The Manager of the Fund is responsible for the other information, except the report of trustee, which the Trustee is responsible to issue. The other information comprises the information included in the annual report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT

TO THE TRUSTEE OF INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND -
continued

Responsibilities of the Manager for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the IASB, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

In addition, the Manager of the Fund is required to ensure that the financial statements have been properly prepared in accordance with the relevant disclosure provisions of the Trust Deed dated 17 November 2010 ("the Trust Deed") and Appendix E of the Code on Unit Trusts and Mutual Funds issued by Hong Kong Securities and Futures Commission (the "SFC Code").

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

In addition, we are required to assess whether the financial statements of the Fund have been properly prepared, in all material respects, in accordance with the relevant disclosure provisions of the Trust Deed and Appendix E of the SFC Code.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.

INDEPENDENT AUDITOR'S REPORT

TO THE TRUSTEE OF INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND - continued

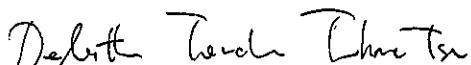

Auditor's Responsibilities for the Audit of the Financial Statements - continued

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Matters under the Relevant Disclosure Provision of the Trust Deed and Appendix E of the SFC Code

In our opinion, the financial statements have been properly prepared, in all material respects, in accordance with the relevant disclosure provisions of the Trust Deed and Appendix E of the SFC Code.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

1 General information

Income Partners Managed Volatility High Yield Bond Fund (the “Sub-Fund”) is a sub-fund of Income Partners Strategy Fund. The Sub-Fund’s investment objective is to maximise total investment returns, comprising capital appreciation and interest income by investing in high yield debt instruments that are primarily below investment grade or unrated.

The Sub-Fund was first established as an exempted Cayman Islands unit trust. The Sub-Fund is governed by a trust deed dated 17 November 2010, as amended, varied or supplemented from time to time between Income Partners Asset Management (HK) Limited (the “Manager”) as a manager and Cititrust Limited (the “Trustee”) as a trustee.

On 14 November 2017, the Trust was authorised by the Securities and Futures Commission of Hong Kong (the “SFC”) under Section 104 of the Hong Kong Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong). The Sub-Fund was subsequently re-domiciled to the jurisdiction of Hong Kong as an open ended umbrella unit trust under the laws of Hong Kong in 2018.

In order to achieve its investment objectives, the Sub-Fund will invest primarily (that is, at least two-thirds of the Net Asset Value of the Sub-Fund) in high yield debt instruments, which are below investment grade or unrated. However, during exceptional circumstances (e.g. market crash or major crisis) or adverse market conditions, the Sub-Fund may be invested temporarily up to 100% of its Net Asset Value in investment grade bonds, short-term money market instruments, cash and/or cash equivalents.

Effective from 4 December 2015, the subscription dealing deadline and redemption dealing deadline were amended so unitholders can give shorter notice of subscriptions and redemptions respectively. Both the subscription dealing deadline and redemption dealing deadline became 5:00 p.m. (Hong Kong time) on the same relevant Dealing Day (or such other day or time as the Manager may from time to time determine), i.e. same day dealing.

Cititrust Limited is the Trustee of the Sub-Fund and is registered as a trust company in Hong Kong. The Trustee is a member of Citigroup Inc.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies

The material accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The financial statements of the Sub-Fund have been prepared in accordance with IFRS Accounting Standards. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS Accounting Standards requires the use of accounting estimates. It also requires the Trustee and the Manager (together, the “Management”) to exercise its judgement in the process of applying the Sub-Fund’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 5.

All references to Net Asset Value (“NAV”) throughout these financial statements refer to net assets attributable to unitholders unless otherwise stated.

Standards and amendments to existing standards effective 1 January 2024

Amendments to IFRSs that are mandatorily effective for the current year

In the current year, the Fund has applied the following amendments to IFRSs relevant to the operation of the Fund that are mandatorily effective for an accounting period that begins on or after 1 January 2024:

Amendments to IFRS 16	Lease Liability in a Sale and Leaseback
Amendments to IAS 1	Classification of Liabilities as Current or Non-current
Amendments to IAS 1	Non-current Liabilities with Covenants
Amendments to IAS 7 and IFRS 7	Supplier Finance Arrangements

The application of the amendments to IFRSs in the current year had no material impact on the Fund's financial positions and performance for the current and prior years and/or on the disclosures set out in these financial statements.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(a) Basis of preparation (Continued)

New and amendments to IFRSs that have been issued but not yet effective

The Fund has not early applied the following amendments to IFRSs that have been issued but are not yet effective:

Amendments to IFRS 9 and IFRS 7	Amendments to the Classification and Measurement of Financial Instruments ³
Amendments to IFRS 9 and IFRS 7	Contracts Referencing Nature-dependent Electricity ³
Amendments to IFRS 10 IAS 28	Sale or Contribution of Assets between an Investor and and its Associate or Joint Venture ¹
Amendments to IFRS Accounting Standard	Annual Improvements to IFRS Accounting Standards - Volume 11 ³
Amendments to IAS 21 IFRS 18	Lack of Exchangeability ² Presentation and Disclosure in Financial Statements ⁴

¹ Effective for annual periods beginning on or after a date to be determined.

² Effective for annual periods beginning on or after 1 January 2025.

³ Effective for annual periods beginning on or after 1 January 2026.

⁴ Effective for annual periods beginning on or after 1 January 2027.

The Manager anticipates that the application of the above new and amendments to IFRSs relevant to the operation of the Manager will result in changes in certain accounting policies and may affect the presentation and disclosures in the financial statements but is not expected to have a material impact on the financial position and performance of the Manager in the foreseeable future.

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 18 Presentation and Disclosure in Financial Statements, which sets out requirements on presentation and disclosures in financial statements, will replace IAS 1 Presentation of Financial Statements. This new IFRS Accounting Standard, while carrying forward many of the requirements in IAS 1, introduces new requirements to present specified categories and defined subtotals in the statement profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. In addition, some IAS 1 paragraphs have been moved to IAS 8 and IFRS 7. Minor amendments to IAS 7 Statement of Cash Flows and IAS 33 Earnings per Share are also made.

IFRS 18, and amendments to other standards, will be effective for annual periods beginning on or after 1 January 2027, with early application permitted. The application of the new standard is expected to affect the presentation of the statement of profit or loss and disclosures in the future financial statements. The Fund is in the process of assessing the detailed impact of IFRS 18 on the Fund's financial statements.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(b) Foreign currency translation

(i) Functional and presentation currency

The Sub-Fund's subscriptions and redemptions of redeemable units are mainly denominated in off-shore Renminbi ("RMB" or "CNH"). The primary activity of the Sub-Fund is to invest in RMB denominated bonds issued in Hong Kong which are traded in off-shore Renminbi. The performance of the Sub-Fund is measured and reported to unitholders in off-shore RMB. The management considers off-shore Renminbi as the currency that most faithfully represents the economic effects of the transactions, events and conditions (the "functional currency"). The Sub-Fund's financial statements are presented in 'off-shore Renminbi', which is the Sub-Fund's functional and presentation currency.

All references to RMB or CNH throughout these financial statements refer to off-shore Renminbi unless otherwise stated. On-shore Renminbi will be presented as CNY throughout these financial statements.

(ii) Translations and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the statement of financial position date.

Foreign exchange gains and losses arising from translation are included in the statement of comprehensive income. Foreign exchange gains and losses relating to cash and cash equivalents are presented in the statement of comprehensive income within 'net foreign exchange losses'.

Foreign exchange gains and losses relating to the financial assets and liabilities carried at fair value through profit or loss are presented in the statement of comprehensive income within 'Net losses on financial assets and liabilities at fair value through profit or loss'.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(c) Financial assets and financial liabilities at fair value through profit or loss

(i) Classification

(i) Assets

The Sub-Fund classifies its investments based on both the Sub-Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Sub-Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Sub-Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Sub-Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Sub-Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

(ii) Liabilities

Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

As such, the Sub-Fund classifies all of its investment portfolio as financial assets or liabilities as fair value through profit or loss. The Sub-Fund's policy requires the Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information. All derivatives are carried in assets when amounts are receivable by the Sub-Fund and in liabilities when amounts are payable by the Sub-Fund.

(ii) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date – the date on which the Sub-Fund commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the statement of comprehensive income within other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the period in which they arise.

Interest on debt securities at fair value through profit or loss is recognised in the statement of comprehensive income.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

**(c) Financial assets and financial liabilities at fair value through profit or loss
(Continued)**

(iii) Fair value estimation

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the statement of financial position date. An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The Sub-Fund utilises the quoted market price for both financial assets and financial liabilities where the quoted market price falls within the bid-ask spread. In circumstances where the quoted market price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

Debt securities are fair valued based on quoted prices. The fair value of debt securities not quoted in an active market may be determined by the Sub-Fund using reputable pricing sources (such as pricing agencies) or indicative prices from bond/debt market makers. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. The Sub-Fund would exercise judgement and estimates on the quantity and quality of pricing sources used. Where no market data is available, the Sub-Fund may value positions using its own models, which are usually based on valuation methods and techniques generally recognized as standard within the industry.

Investments in other investment funds are valued by reference to their net asset value which the Directors consider as approximation of their fair values. If the net asset value of the investment funds is not available or the Directors consider that such net asset value is not reflective of the fair value, the Directors may exercise judgment and discretion to determine the fair value of the investment funds.

(iv) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(d) Derivative financial instruments

Derivative financial instruments are deemed to be held for trading purposes and initially recognised in the statement of financial position at fair value. Fair values are obtained from quoted market prices and pricing models as appropriate. In the event that quoted prices of certain derivative financial instruments are unavailable, the Manager will use other valuation methods that the Manager deems appropriate, such as pricing the said instruments based on comparable risk assets with similar characteristics in the market. All derivatives are carried in assets when amounts are receivable by the Sub-Fund and in liabilities when amounts are payable by the Sub-Fund. Changes in fair values of derivatives are included in the statement of comprehensive income.

(e) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

(f) Amounts due from and due to brokers

These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Sub-Fund shall measure the loss allowance on amounts due from broker at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Sub-Fund shall measure the loss allowance at an amount equal to 12-month expected credit losses. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required. If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due. Any contractual payment which is more than 90 days past due is considered credit impaired.

(g) Cash and cash equivalents

Cash and cash equivalents includes cash in hand and deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less.

(h) Accrued expenses

Accrued expenses are accounted for on an accruals basis and charged to the statement of comprehensive income.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(i) Redeemable units

The Sub-Fund issues 21 (2023: 24) classes of redeemable units which are redeemable at the unitholder's option and do not have identical rights. Such units are classified as financial liabilities. Redeemable units can be put back to the Sub-Fund at any dealing date for cash equal to a proportionate unit of the Sub-Fund's net asset value attributable to the unit class. The redeemable units are redeemable daily.

The redeemable units are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the unit back to the Sub-Fund.

Redeemable units are issued and redeemed at the holder's option at prices based on the Sub-Fund's NAV per unit at the time of issue or redemption. The Sub-Fund's net asset value per unit is calculated by dividing the net assets attributable to the holders of each class of redeemable units with the total number of outstanding redeemable units for each respective class. In accordance with the provisions of the Sub-Fund's regulations, investment positions are valued based on the mid price for the purpose of determining the NAV per unit for subscriptions and redemptions.

(j) Interest income and interest from financial assets at financial assets at fair value through profit or loss

Interest income includes interest from cash and cash equivalents. Interest is recognized on a time-proportionate basis using the effective interest method.

Interest on debt securities at fair value through profit or loss is recognised using the coupon rate.

(k) Distributions payable to holders of redeemable units

Proposed distributions to holders of redeemable units are recognised in the statement of comprehensive income when they are appropriately authorised and no longer at the discretion of the Sub-Fund. The distribution on the redeemable units is recognised as a finance cost in the statement of comprehensive income.

The Manager intends to distribute income or capital attributable to the Distribution Classes monthly on such date as may be determined by the Manager, or such other time or frequency as the Manager considers appropriate.

In the event that the income generated from the Sub-Fund's investments attributable to the relevant Distribution Classes during the relevant period is insufficient to pay distributions as declared, the Manager may in its discretion determine such distributions be paid from capital.

(l) Taxation

The Sub-Fund currently incurs withholding taxes on investment income and capital gains. Investment income and capital gains are recorded gross of any withholding tax in the statement of comprehensive income. Withholding taxes are shown as a separate item in the statement of comprehensive income.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(m) Collateral

Cash collateral provided by the Sub-Fund is identified in the statement of financial position as margin account with the brokers and is not included as a component of cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Sub-Fund classifies that asset in its statement of financial position separately from other assets and identifies the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

(n) Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes; (a) restricted activities, (b) a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors, (c) insufficient equity to permit the structured entity to finance its activities without subordinated financial support and (d) financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

The Sub-Fund considers all of its investments in other funds (“Investee Funds”) to be investments in unconsolidated structured entities. The Investee Funds are managed by the Manager and applied various investment strategies to accomplish their respective investment objectives. The Investee Funds finance their operations by issuing redeemable shares which are puttable at the holder’s option and entitles the holder to a proportional stake in the respective fund’s net assets. The Sub-Fund holds redeemable shares in each of its Investee Funds.

The change in fair value of each Investee Fund is included in the statement of comprehensive income in ‘net losses on financial assets and financial liabilities at fair value through profit or loss’.

(o) Expected credit losses on financial assets measured at amortised cost

The Sub-Fund recognises a loss allowance for expected credit loss (“ECL”) on other receivable. Other receivable is recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

In measuring ECLs, the Sub-Fund takes into account reasonable and supportable information that is available without undue cost or effort. This includes information about past events, current conditions and forecasts of future economic conditions.

Measurement of ECLs

The Sub-Fund established ECL model by using a statistical approach for financial instruments. This approach involves estimation of four risk parameters, i.e. Probability of Default (“PD”), Loss Given Default (“LGD”), Exposure at Default (“EAD”) and expected life, as well as the use of effective interest rate and forward-looking information.

In calculating the expected credit loss rates, forward looking macroeconomic information, such as unemployment rate or gross domestic product (“GDP”), is incorporated as part of risk parameters estimation.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(o) Expected credit losses on financial assets measured at amortised cost (Continued)

Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Sub-Fund in accordance with the contract and the cash flows that the Sub-Fund expects to receive).

ECLs are measured on either of the following basis:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies.

- | | | |
|---------|---|---|
| Stage 1 | - | Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECL |
| Stage 2 | - | Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECL |
| Stage 3 | - | Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs. |

Significant increases in credit risk ("SICR")

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Sub-Fund compares the risk of default occurring on the financial instrument assessed at the reporting date with that assessed at the date of initial recognition. In making this reassessment, the Sub-Fund considers that a default event occurs when the borrower is unlikely to pay its credit obligations to the Sub-Fund in full, without recourse by the Sub-Fund to actions such as realising security (if any is held). The Sub-Fund considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

Evidence that a financial asset is credit-impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; or
- the disappearance of an active market for a security because of financial difficulties of the issuer.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

2 Material accounting policies (Continued)

(o) Expected credit losses on financial assets measured at amortised cost (Continued)

Write-off policy

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Sub-Fund determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(p) Other income

The other income represents the consent fees from a corporate action exchange offer, which was approved by a majority of investors to vote in response to this action. The issuer will be entitled to receive the consent fee as an income.

3 Financial risk management

The Sub-Fund's activities expose it to a variety of financial risks: market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk.

The principal investment objective of the Sub-Fund is to provide a return of capital growth and income in RMB or RMB equivalent terms. The Sub-Fund mainly invests in Renminbi instruments which are below investment grade or unrated with long-only position. The portfolio of the Sub-Fund is expected to maintain a level of diversity across countries and industries.

The Sub-Fund uses different methods to measure and manage the various types of risk to which it is exposed, these methods are explained below.

(a) Market price risk

Market price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or factors affecting all instruments in the market.

The Sub-Fund's investment in debt securities, investment fund and derivative financial instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments. The Manager monitors the Sub-Fund's market price risk on a daily basis and the Trustee reviews it on a daily basis. The following table discloses the financial asset investments at fair value through profit or loss of the Sub-Fund by product type:

	2024	2023
	RMB	RMB
Financial assets at fair value through profit or loss		
Corporate bonds	160,022,569	152,106,291

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(b) Currency risk

Foreign currency risk arises as the fair value and future cash flows of monetary assets and monetary liabilities denominated in other currencies fluctuate due to changes in foreign exchange rate.

The Sub-Fund has exposure to fluctuation in currency exchange rates where it invests in assets and liabilities denominated in currencies other than Renminbi, the functional currency. The sensitivity of the Sub-Fund's NAV as a whole in percentage terms to movements in specific currencies can be derived from the tables below. The Manager monitors the Sub-Fund's currency position on a daily basis.

The table below summarises the Sub-Fund's exposure to currency risks in respect of its monetary and non-monetary assets and liabilities, including off statement financial position exposure on derivatives and notional value of open currency forward contracts, as at the statement of financial position date on 31 December 2024 and 2023.

	Net exposure equivalent	
	2024 RMB	2023 RMB
Monetary items		
Australian Dollar (“AUD”)	18,343	(123,100)
Euro (“EUR”)	10,209	4,096
Hong Kong Dollar (“HKD”)	151,832	(29,796,159)
Singapore Dollar (“SGD”)	4,601	(16,644)
United States Dollar (“USD”)	18,330,953	(46,779,565)

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
 (Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(b) Currency risk (Continued)

The table below summarises the impact of increases or decreases of the key currency exchange rates to which the Sub-Fund's net assets (monetary and non-monetary) are exposed. The analysis is based on the assumption that the exchange rates increased or decreased by the respective percentage with all other variables held constant.

	2024		2023	
	Estimated reasonable possible change against RMB	Impact on NAV and profit after tax RMB	Estimated reasonable possible change against RMB	Impact on NAV and profit after tax RMB
	+/-	+/-	+/-	+/-
AUD	6.5%	1,192	2.9%	(3,570)
EUR	3.5%	357	6.2%	254
HKD	3.5%	5,314	2.8%	(834,292)
SGD	0.5%	23	4.6%	(766)
USD	3.0%	549,929	2.9%	(1,356,607)

The Manager has used their view of what would be a “reasonable shift” in exchange rates to estimate the change for use in currency risk sensitivity analysis above.

Disclosures above are shown in absolute terms, changes and impacts could be positive or negative. Changes in estimated reasonable possible changes in exchange rates are revised annually depending on the Manager's current view of exchange rates volatility and other relevant factors.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
 (Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(c) Interest rate risk

The Sub-Fund is exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows. The tables below summarise the Sub-Fund's exposure to interest rate risks at the statement of financial position date. Included in the table are the Sub-Fund's assets and liabilities at fair values, categorised by the earlier of contractual repricing or maturity dates. The fair values of derivative financial instruments are included below under the heading 'Non-interest bearing'. Refer to Note 3(a) for details.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(c) Interest rate risk (Continued)

At 31 December 2024, if interest rates on the margin account, cash and cash equivalents had been 100 basis points higher or lower with all variables held constant, net assets attributable to unitholders would have been RMB190,647 (2023: RMB225,735) higher or lower as a result of higher or lower interest income.

The table below summarises the average effective interest rate for monetary financial instruments at the statement of financial position date. For puttable or callable financial instruments, the effective interest rates are based on the lower of yield to maturity, yield to call or yield to put.

	2024 %	2023 %
Assets		
Bank balances	0.00	0.03
Margin deposits	4.33	4.86
Investments at fair value through profit or loss		
- Corporate bonds	14.78	12.09
- Government bonds	7.88	8.67

Interest rate exposures are expressed in terms of rate of weighted modified duration. The Manager and Trustee monitor the interest rate risks by quantifying (a) market exposure in percentage terms; and (b) exposure in duration terms by different countries.

The figures in the tables below imply the interest rate exposure in duration terms. Given a 100 bps change in the rate of all debt securities held by the Sub-Fund as at 31 December 2024, the percentage change in the debt securities will be the total weighted average modified duration multiplied by 1%, i.e. 2.49% (2023: 1.74%), while holding all other variables constant. The sensitivity of the Sub-Fund's debt securities as a whole in percentage terms to movements in specific types of interest rate exposure can be derived from the tables below.

(d) Credit risk

The Sub-Fund is exposed to credit risk, which is the risk that counterparty will be unable to pay amounts in full when they fall due.

The main concentration to which the Sub-Fund is exposed arises from the Sub-Fund's investments in debt securities. The Sub-Fund is also exposed to counterparty credit risk on trading derivative products, cash and cash equivalents, collateral, and other receivable balances.

The Sub-Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management consider both historical analysis and forward looking information in determining any expected credit loss.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
 (Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(d) Credit risk (Continued)

(i) Investment's credit risk

The Sub-Fund's credit risk concentration is spread between debt securities and derivative products as discussed above under market risk diversification. The credit ratings of the debt securities range from AA+ to NR (2023: BBB+ to NR). Debt securities which are not rated represent approximately 46.47% (2023: 13.00%) of the NAV of the Sub-Fund. The Manager will regularly monitor the credit risk of all investments by assessing global credit market and the impact of different scenarios. The analysis below summarises the credit quality of the Sub-Fund's debt portfolio as a percentage of NAV at the year end.

Credit rating (best rating of Standard & Poor's/Moody's/Fitch)	2024 % of NAV	2023 % of NAV
AA+/Aa1	0.37	-

As at 31 December 2024, Nil (2023: 8) investments of Nil (2023: RMB11,470,361) were in default. The Manager monitors each issuer's credit risk by performing intensive credit analysis and constantly monitoring any changes in its risk factors.

Details of the investments are disclosed in Note 3(a). As refer to Note 3(d)(ii), assets placed with the brokers and custodian by the Sub-Fund is amounted to RMB203,150,452 (2023: RMB218,456,191).

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

3 Financial risk management (Continued)

(d) Credit risk (Continued)

(i) Investment's credit risk (Continued)

The forward foreign exchange contracts are entered into with investment grade international financial institutions. At any time, the net exposure of the Sub-Fund to the obligations of any one issuer will not normally exceed 10% of the gross assets, except for securities issued or guaranteed by government, sovereign and quasi-sovereign entities, public or local authorities.

The tables above provide an overview of the credit risks as at 31 December 2024 and 2023. Credit market risks are generally quantified by (a) market exposure in percentage terms; and (b) exposure in duration terms.

The Manager monitors the Sub-Fund's credit exposures on a daily basis and the Trustee reviews it on a daily basis.

(ii) Assets with the brokers and custodian

The Sub-Fund is exposed to credit risk on its bank deposits and balances, and assets held with the brokers.

Accordingly, the Sub-Fund has a significant credit risk towards the brokers and custodian to the extent that the brokers and custodian may be unable to fulfill their obligation to return the Sub-Fund's cash and assets. Management considers the probability of default to be low, except for the other receivables, as the counterparties are at investment grade.

As a result, no loss allowance of assets placed with brokers and custodian has been recognised based on 12-month expected credit losses as any such impairment would be immaterial to the Sub-Fund. As at 31 December 2024 and 2023, the aggregate value of the Sub-Fund's assets held with the brokers and custodian were as follows:

	2024 RMB	2023 RMB
Bank deposits and bank balance with custodian	5,574,079	4,118,767
Assets pledged with brokers	13,490,605	18,454,683
Other assets with brokers and custodian	184,085,768	195,882,741
Total assets placed with the brokers and financial institutions	203,150,452	218,456,191

As at 31 December 2024 and 2023, the credit rating of the brokers and custodian are at or above investment grade. The Manager monitors the Sub-Fund's credit risk position on a daily basis.

3 Financial risk management (Continued)

(d) Credit risk (Continued)

(iii) Assets with other receivables

As at 31 December 2023, management has assessed that the other receivables balance is impaired which was a significant increase in credit risk observed and the receivable was past due over 90 days.

Management made forward looking adjustments to the ECL of the other receivables by analysing the impacts of various economic variables and measured the ECL as a probability weighted lifetime ECL classified as stage 3. Accordingly, an impairment charge of RMB1,112,537 was recognized in 2023.

(e) Offsetting and amounts subject to master netting arrangements and similar agreements

The Sub-Fund was subject to three (2023: three) master netting agreements with its financial instrument counterparties. All of the financial assets and liabilities of the Sub-Fund are held with these counterparties and margin balances are maintained by the Sub-Fund for the purpose of providing collateral on derivative positions.

The following table presents the Sub-Fund's financial assets and liabilities subject to offsetting, enforceable master netting arrangements and similar agreements. The tables are presented by type of financial instrument.

Transactions with the counterparties are governed by separate master netting agreements. Each agreement allows for net settlement of certain open contracts where the Sub-Fund and respective counterparty both elect to settle on a net basis. In the absence of such an election, contracts will be settled on a gross basis. However, each party to the master netting agreement will have the option to settle all open contracts on net basis in the event of default of the other party. Per the terms of each master netting agreement, an event of default includes the following:

- failure by a party to make payment when due;
- bankruptcy.

(f) Liquidity risk

Liquidity risk is the risk that the Sub-Fund may not be able to generate sufficient cash resources to settle its obligation in full as they fall due or can only do so on terms that are materially disadvantageous.

The liquidity of the Sub-Fund's investments in corporate bonds and other derivative financial instruments may vary substantially depending on market conditions. The liquidity of the various instruments in the Asian debt markets has fluctuated and changed substantially over time. The market for relatively illiquid securities tends to be thinner than the market for more liquid securities.

Investments in relatively illiquid securities may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. The risk of illiquidity also arises in the case of over-the-counter transactions. There is no regulated market in such contracts and the bid and offer prices are established solely by dealers in these contracts.

The table below analyses the Sub-Fund's financial liabilities and derivative financial liabilities that will be settled on a net basis into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flow.

As at 31 December 2024, the total assets of the Sub-Fund amounted to RMB207,346,038 (2023: RMB224,406,885). The Manager manages the Sub-Fund's liquidity risk by investing predominantly in listed and quoted bonds and derivatives that the Manager considered them as highly liquid for disposal.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

4 Fair value estimation

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the year end date. The Sub-Fund measures both financial assets and financial liabilities at quoted market price.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value hierarchy has the following levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes ‘observable’ requires significant judgement by the Sub-Fund. The Sub-Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following table analyses within the fair value hierarchy the Sub-Fund’s financial assets and liabilities measured at fair value. Please refer to Note 3(a) for disclosure of the Sub-Fund’s financial assets and liabilities by class.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

4 Fair value estimation (Continued)

Investments whose values are based on quoted market prices in active markets are classified within level 1, include futures. The Sub-Fund does not adjust the quoted price for these instruments. As at 31 December 2024 and 2023 the Sub-Fund did not hold any investment, classified in level 1.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted/tradable market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include corporate bonds, government bonds, investment funds and forward foreign exchange contracts. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. As observable prices are not available for these securities, the Sub-Fund has used valuation techniques to derive the fair value. As at 31 December 2024 and 2023 the Sub-Fund did not hold any investment, classified in level 3.

Management considers the carrying value of the Sub-Fund's other financial assets and financial liabilities are a reasonable approximation of fair value.

There is no transfer between the levels of fair value hierarchy during the year ended 31 December 2024 and 2023.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

5 Critical accounting estimates and judgments

(a) Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

Fair value of financial instruments

The Sub-Fund may, from time to time, hold financial instruments that are not quoted in active markets, whereby the arranging banks or placement banks would be the sole providers of mark to market prices. Fair values of such instruments are determined by using valuation techniques. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by experienced personnel at the Manager. The Manager also closely monitors the coupon and principal payment of these fixed income and debt instruments.

In certain cases, the Manager may determine the prices or make adjustments to the market values of investments at their discretion if they believe that an adjustment is required to arrive at the fair value of the investment.

Models use observable data, to the extent practicable. However, areas such as credit risk (both own and counterparty), volatilities and correlations require management to make estimates. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The Sub-Fund holds financial instruments that are not actively traded on an exchange such as unlisted bonds and derivative instruments which may not trade in an active market and whose fair value has been determined by reference to quotations provided by the relevant brokers. Their quotations may be indicative quotes only and may not necessarily represent actual transactions price nor may represent a binding offer price. The Management considers that the above valuation approach as the best estimate of the fair value of the investments. Actual transacted prices may differ from the quotes provided by the relevant brokers.

The investment funds held by the Sub-Fund are subject to the terms and conditions of the respective offering documentation of the investment funds. The investment funds are primarily valued on the latest available redemption price of such units/shares for each investment fund, as determined by the respective fund administrators or fund managers of such investment fund. If necessary, the Directors make adjustments to the net asset value of various investment funds to obtain the best estimate of fair value.

NOTES TO THE FINANCIAL STATEMENTS

8 Structured entities

The Sub-Fund's investments in Investment Fund are subject to the terms and conditions of the respective Investee Fund's offering documentation and are susceptible to market price risk arising from uncertainties about future values of those Investee Fund. The Investee Fund in the investment portfolio is managed by portfolio managers who are compensated by the Investee Fund for its services. Such compensation generally consists of an asset based fee and a performance based incentive fee and is reflected in the valuation of the Sub-Fund's investment in each of the Investee Fund.

The right of the Sub-Fund to request redemption of its investments in PFMF1 (2023: IPRMBBF) is on every business day.

The exposure to investments in Investee Fund at fair value by strategy employed is disclosed in the following table. The investment is included in financial assets at fair value through profit or loss in the statement of financial position.

As at 31 December 2024

Strategy	Number of Investee Fund	Net Asset Value of Investee Fund RMB million	Investment fair value RMB	% of net assets attributable to holders of redeemable shares
Fixed income	1	12.10	9,057,971	4.46

As at 31 December 2023

Strategy	Number of Investee Fund	Net Asset Value of Investee Fund RMB million	Investment fair value RMB	% of net assets attributable to holders of redeemable shares
Fixed income	1	27.51	25,060,658	11.29

The investment fund represents PFMF1 which is managed by Manager of privately offered fund (2023: IPRMBBF, which is managed by the Manager of the Sub-Fund.)

The principal investment objective of PFMF1 is to achieve long-term stable investment returns. PFMF1 invests in fixed income assets such as Treasury bonds, local government bonds, policy financial bonds, commercial bank financial bonds, (ultra) short-term financing bonds, medium-term notes, and corporate bonds issued in the People's Republic of China ("PRC") which carry a credit rating grade of at least AA or equivalent assigned by one of the local rating agencies recognized by the relevant authorities in the PRC.

The principal investment objective of IPRMBBF is seek for long term interest income and capital appreciation through investment RMB-denominated fixed income securities through RQF II quota. It was sold in 2024.

The Sub-Fund's investment strategy entails trading in other funds on a regular basis. Total purchases and total sales in the investee fund during the year ended 31 December 2024 were RMB9,000,000 (2023: Nil) and RMB24,281,983 (2023: RMB23,996,519). The Sub-Fund intends to continue opportunistic trading in other funds.

The management fee is accrued daily and payable monthly in arrears.

Total management fees for the year ended 31 December 2024 amounted to RMB3,044,748 (2023: RMB4,624,121) with RMB228,619 (2023: RMB275,939) outstanding as at 31 December 2024.

The Manager will give one month's prior notice to unitholders should there be any increase of the management fee from the current level up to the maximum level of 2% per annum of the net asset value of the Sub-Fund.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
 (Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

9 Transactions with related parties and connected persons (Continued)

(b) Trustee fee

The trustee fee paid to the Trustee accrued from the assets of the Sub-Fund is based on 0.0075% (2023: 0.0075%) per annum of the NAV of the Sub-Fund, subject to a minimum of USD10,000 (2023: USD10,000) per annum. The Trustee will give one month's prior notice to unitholders should there be any increase of the trustee fee from the current level up to the maximum level of 1% per annum of the NAV of the Sub-Fund.

The table below summarises the trustee fees and trustee fee payable by Sub-Fund as at 31 December 2024 and 2023:

	2024 RMB	2023 RMB
Trustee fee	72,381	71,159
Trustee fee payable	<u>6,377</u>	<u>6,070</u>

(c) Investments in fund managed by the Manager

As set out in Note 3(a), the Sub-Fund invested into PFMF1 which is managed by the Manager of privately offered fund on 16 November 2020 (2023: IPRMBBF, which is managed by the Manager of the Sub-Fund and disposal on 27 February 2024).

The principal investment objective of PFMF1 is to achieve long-term stable investment returns. PFMF1 invests in fixed income assets such as Treasury bonds, local government bonds, policy financial bonds, commercial bank financial bonds, (ultra) short-term financing bonds, medium-term notes, and corporate bonds issued in the People's Republic of China ("PRC") which carry a credit rating grade of at least AA or equivalent assigned by one of the local rating agencies recognized by the relevant authorities in the PRC.

The following table summarises the ownership of investment fund managed:

	Holding	Unit price RMB	Fair value RMB
At 31 December 2024			
PFMF1	<u>14,492,754</u>	<u>0.62</u>	<u>9,057,971</u>
At 31 December 2023			
IPRMBBF	<u>32,500</u>	<u>771.10</u>	<u>25,060,658</u>

During the year ended 31 December 2024 and 31 December 2023, the Sub-Fund did not receive any dividend income from its investment in PFMF1 which is managed by the Manager of privately offered fund (2023: IPRMBBF, which is managed by the Manager of the Sub-Fund.)

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
 (Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

14 Other receivable

	2024 RMB	2023 RMB
Other receivable	-	1,335,044
Less: Allowance for expected credit losses	-	(1,112,537)
	<hr/>	<hr/>
	-	222,507
	<hr/>	<hr/>

As at 31 December 2023, the balance of other receivable amounted RMB1,335,044 was categorised in Stage 3 under the ECL model as the counterparty is assessed to be in default, with little prospect for recovery of principal or interest. During the year ended 31 December 2024, the other receivable with RMB1,112,537 is written off.

15 Taxation

No provision for Hong Kong profits tax has been made for the Fund as it is authorised as a collective investment scheme under Section 104 of the Hong Kong Securities and Futures Ordinance and is therefore exempt from profits tax under Section 26A(1A) of the Hong Kong Inland Revenue Ordinance.

People's Republic of China ("PRC")

On 7 November 2018, the Ministry of Finance ("MOF") and the PRC State Taxation Administration ("STA") jointly issued a notice Caishui [2018] No.108 ("Circular 108") which stipulates that foreign institutional investors are temporarily exempted from PRC withholding income tax ("WIT") and Value-Added Tax ("VAT") in respect of bond interest income received from 7 November 2018 to 6 November 2021. On 22 November 2021, the MOF and the STA officially issued Public Notice [2021] No.34 to extend the corporate income tax ("CIT") and VAT exemption treatment on the bond interest income for the foreign institutional investors investing in the domestic bond market from 6 November 2021 to 31 December 2025.

During the years ended 31 December 2024 and 2023, the Fund invests in PRC debt securities in PRC through the RMB Qualified Foreign Institutional Investor ("RQFII") program. The Manager considers that the enforcement of PRC tax on gains derived from the PRC debt securities is uncertain as at the date of approval of these financial statements and has exercised its judgment when assessing whether the Fund may be liable for PRC taxation on its gains, the amount of potential liability and the probability of such tax being levied up to the reporting date. The Manager considered that the WIT policy for Qualified Foreign Institutional Investor ("QFII")/RQFII's investment in debt securities has not been clarified in the "Notice on temporary exemption of Corporate Income Tax on capital gains derived from the transfer of equity investment assets such as PRC domestic stocks by QFII and RQFII" (the "Notice").

The Manager has reassessed the provisioning approach and has continued not making PRC WIT provision on gains derived from the PRC debt securities of the Fund. However, significant uncertainties exist and estimation of the Manager may substantially differ from the actual events.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

NOTES TO THE FINANCIAL STATEMENTS

16 Soft commission arrangements

The Manager confirms that there has been no soft commission arrangement existing during the year ended 31 December 2024 and 2023 in relation to directing transactions of the Sub-Fund through a broker or dealer.

17 Borrowings

The Sub-Fund had no borrowings as at 31 December 2024 and 2023.

18 Contingent liabilities and commitments

The Sub-Fund had no contingent liabilities and commitments as at 31 December 2024 and 2023.

19 Negotiability of assets

As at 31 December 2024 and 2023, there was no statutory or contractual requirement restricting the negotiability of the assets of the Sub-Fund.

20 Subsequent event

Subsequent to the year ended 31 December 2024, the Sub-Fund received RMB67,257,699 (2023: RMB1,070,425) in subscriptions and paid RMB124,138,156 (2023: RMB19,008,343) in redemptions. Other than disclosed above, there have been no events subsequent to year end which require adjustment or disclosure in the financial statements in accordance with IFRS Accounting Standards.

21 Approval of the financial statements

The financial statements were approved by the Manager and the Trustee on 30 April 2025.

INCOME PARTNERS MANAGED VOLATILITY HIGH YIELD BOND FUND
(Sub-Fund of Income Partners Strategy Fund)

**INFORMATION ON EXPOSURE ARISING FROM FINANCIAL DERIVATIVE INSTRUMENTS
(UNAUDITED)**
FOR THE YEAR ENDED 31 DECEMBER 2024

The lowest, highest and average gross exposure arising from the use of financial derivative instruments for any purpose as a proportion to the Sub-Fund's total net asset value for the year ended 31 December 2024 and 2023:

	2024 % of NAV	2023 % of NAV
Lowest gross exposure	90.13%	82.82%
Highest gross exposure	114.12%	105.63%
Average gross exposure	102.45%	88.50%

The lowest, highest and average net exposure arising from the use of financial derivative instruments for investment purpose as a proportion to the Sub-Fund's total net asset value for the year ended 31 December 2024 and 2023:

	2024 % of NAV	2023 % of NAV
Lowest net exposure	0.00%	0.00%
Highest net exposure	0.00%	0.00%
Average net exposure	0.00%	0.00%
